The card that thinks before it pays.

Uniqo is built around one idea: control.

Not another bank. Not another card.

A simpler way to manage how money moves.

01

The card is a key, not a vault

Money stays in the customer's own accounts.
At the moment of payment the card decides
where each payment comes from.

02

Most fintechs focus on features

Uniqo focuses on control: what happens
before a payment, at the moment of paying,
and right after it.

03

Ask for as little as possible

Never make the customer type what can be
checked, guessed or skipped. Fewer inputs,
fewer mistakes.

Four principles

They decide every screen, every sentence and every slide.

1

Control first

Every feature answers one question: does it give the customer more control?

2

Quiet by default

Calm surfaces, plenty of space. Nothing shouts. Colour comes from the card, not from the interface.

3

Minimum input

Phone number, one code, an ID check. Every extra field must earn its place.

4

Honest

Uniqo is not a bank and not a lender. Say what we are, plainly, and never promise more than the product does.

Wordmark

The wordmark is our primary logo for all communication. It is used in black on light and in white on dark. Nothing else.

The wordmark 'uniqo' is displayed in a white, lowercase, sans-serif font against a solid black background. The letters are clean and modern, with a consistent weight throughout.The wordmark 'uniqo' is displayed in a black, lowercase, sans-serif font against a solid white background. The letters are clean and modern, with a consistent weight throughout.

App icon

The app icon is used only for the app, stores and small spaces. Never lock it up with the wordmark.

Clear space and size

Keep a margin of 1x around the wordmark, where x is the height of the wordmark. Nothing enters this zone. Never use it below 96 px or 24 mm wide.

uniqo

Minimum: 96 px · 24 mm

Misuse

Always use the master artwork. Make sure the logo is clearly visible and never edited or distorted.

Do not rotate

Do not recolour

Do not outline

Do not stretch

Do not add effects

Do not add gradients

Do not crop

Do not use on busy or low-contrast backgrounds

Core palette

Quiet greys and black. The interface stays neutral so the card can carry the colour.

Ink
#050505 · RGB 5 5 5
Text, primary buttons

Muted
#686868 · RGB 104 104 104

Native, all the way down.

We do not redraw what the platform already does well. Uniqo is built with Apple's own components, Liquid Glass included, so it looks, moves and behaves exactly like the device it runs on.

Our rule

Use the system first. Add our own only where it protects the idea: control.

The cards

Three designs, three plans. Arctic is free. Plans and prices are pre-launch and may change.

Arctic

Built for essentials · Free

Midnight

More control · \$4.99 / month

Graphite

Total control · \$9.99 / month

The app

Native iOS, built in SwiftUI. Light and dark. Phone, code, ID check, done.

Open

Phone and code

ID and selfie

Home

Control, in the hand

Freeze, PIN, limits, Apple Wallet, and account details for ACH.

Account details

Voice

Short sentences, plain words, calm confidence. We explain, we do not sell.

Say

Freeze your card in one tap.

You tap. Uniqo works out where to pay from.

Your money stays in your own accounts.

Uniqo is not a bank.

Avoid

~~Revolutionary banking of the future.~~

~~Powered by next gen AI.~~

~~The ultimate neobank.~~

~~Guaranteed protection from fraud.~~

Legal and use

Uniqo is a pre-launch product by FrameLabs LLC. Do not describe Uniqo as a bank or as a currently available financial service.
